### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a reconfigurable digital processor for film conversion. Each independent claim identifies the uniquely distinct features: "a plurality of reprogrammable circuit elements in a circuit which is laid out in three or more groups of reprogrammable elements where the groups are configured to received digital data corresponding to film image pixels and perform two or more film conversion processing steps on the film image pixels using digital technology and where the number of elements in each group can be increased to improve the performance or can be reduced to decrease the cost of the system". All the references of record, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
